

KINGSLEY 2020 CATALOG

Founded in 1962 as Jackson Manufacturers Company, Kingsley got its current moniker from its esteemed owners, Jackson and Eleanor Kingsley. The Kingsleys set out to make specialty metal depositories. The company started with products such as trash cans including a design so iconic that it can still be seen at popular theme parks in Southern California. It wasn't until Claremont College contacted Eleanor and asked the company to develop something that students could use to drop off books, that the book return was born.

Since that initial design, Kingsley has not only revolutionized the library industry by redesigning the book return several times over, but has developed an unequivocal passion towards improving the industry all together. From new features such as the one-handed KwikDrop, larger capacities, and rust-free aluminum, Kingsley has seen it all and has shaped the way that libraries receive their collections back for over half a century.

Kingsley is proud to continue our legacy of quality and innovation as we push forward into a new decade. With new products and new technological advancements on the horizon, we are continuing our tradition of striving to make the jobs of librarians easier every day. We are excited for what lies ahead and are proud to serve such an important industry.

Compact Hood Design

The S-Series depository opening protrudes slightly from the body of the unit and is fully accessible from all sides. In addition to giving the entire unit a smaller footprint, this also makes it easier for walk-up deposits as it allows for deposits to be made from a variety of angles.

STANDARD OUTDOOR FEATURES

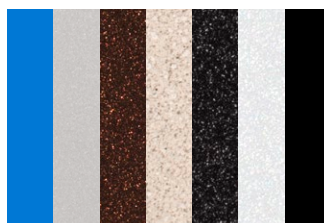

All Aluminum Body

Units are made from aircraft grade aluminum alloy that is stronger than comparable stainless steel and more dent resistant. It will never rust, corrode, streak, or discolor. Great for corrosive coastal areas and where roads are salted for snow.

ADA Compliance

Units stand 53-54" tall allowing them to be used for drive-up deposits while being ADA Compliant for walk-ups (if properly installed). Depository openings allow for one-handed deposits. Standard wording is large, high contrast text. Self-adhesive braille labels are also available.

Protective Finishes

Choose from seven different standard powder coat finishes. Powder coat is sealed with an anti-graffiti clear coat that allows you to easily remove paint and marker with solvents. This brilliant glossy finish also provides UV protection against fading and is scratch resistant.

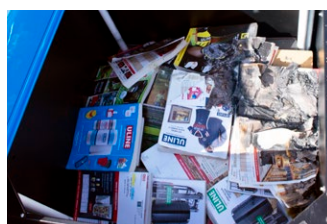

Weather Resistant

All seams are sealed to keep water out. Units come with a pre-installed drip rail to protect the top of the access door from rain and snow. The access door has a paddle handle that covers the lock to keep out ice and debris. All outdoor units also have fully ramped bottoms.

Theft Deterrent

Depository openings and chutes are constructed to prevent items from being pulled out. Inter-locking seams cannot be pried apart. Access door is attached with a full-length piano hinge. The rest of the door is secured with a three-point commercial lock.

Fire Suppressant

Kingsley units are sealed so well for weather protection that they are also fire suppressant. They have the ability to smother a flame inside the unit in roughly two minutes to keep damage to a minimum.

Rotatable Hoods

The tops of all single hood outdoor returns can rotate a full 360°. For dual hood Supermax Versa models, each hood can rotate 270°. This gives you the ability to place the opening and access door(s) in any configuration you need to fit your space.

Customization Options

Standard vinyl decals include wording and graphics options to help you properly convey the purpose of your unit. Custom powder coat colors, wording, and graphic decals are also available upon request.

OUTDOOR RETURNS CONT.

C-Series

The C-Series is designed to be the perfect drive-up book drop. Drive-up returns allow patrons to return items without having to get out of their cars and into inclement weather, needing to use mobility devices, or having the hassle of taking kids out of the car. The depository sweeps 13" toward the curb which allows the cabinet to sit safely back and avoid most collisions. This premium line includes six different capacities and additional features such as a locking depository.

Locking Depository Opening

All C-Series returns come with two cam locks, one on either side of the depository opening, to secure the flap and keep the unit from accepting anymore items.

Liquid Diversion System

If any liquids do manage to make it through the depository opening, the C-Series depository is designed to divert it away from the collection area.

Anti-Collision Design

The depository hood extends approximately 13" from the curb for easier deposits from vehicles. The cabinet sits safely back, avoiding most collisions.

STANDARD OUTDOOR FEATURES

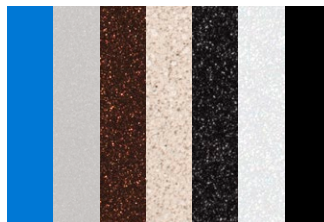

All Aluminum Body

Units are made from aircraft grade aluminum alloy that is stronger than comparable stainless steel and more dent resistant. It will never rust, corrode, streak, or discolor. Great for corrosive coastal areas and where roads are salted for snow.

ThruWalls

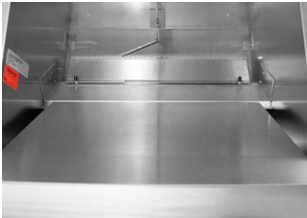

The Ease Single ThruWall is a one piece exterior unit that is easy to install and perfect for walk up building deposits. This ThruWall has a stainless steel faceplate with aluminum body and comes pre-assembled, ready to insert into a wall like a wall mounted AC.

The depository flap is easily locked from the inside with a knob on the back of the unit. Turn left to lock and right to unlock.

Pre-installed MagnaClose helps to close the flap after use and keeps it closed when not in use, even in most winds.

SKU	Name	Dimensions	Extension Kit
10-8100	Ease Single ThruWall	22½"W x 16½"D x 20½"H	19-0001

Make drive-up deposits easier with the Ease Drive-Up ThruWall. This all-in-one, easy to install unit has an elongated depository that extends 10.5" towards the curb so it's easier to reach from inside of a vehicle. This ThruWall has a stainless steel faceplate with aluminum body and comes pre-assembled, ready to insert into a wall like a wall mounted AC.

The depository flap of the Ease Drive-Up opens upward and has spring hinges to automatically close the flap after use and keep it securely closed when not in use, even in most winds.

SKU	Name	Dimensions	Extension Kit
10-8175	Ease Drive-up ThruWall	22"W x 25½"D x 20"H	19-0003

ThruWall units allow you to accept books, media, and other materials directly inside your building. They are great for use in combination with automated sorting systems or just your standard cart. Our ThruWall units are designed and built to last the life of the building and we stand by that quality. All ThruWall units are designed for 13" walls. Extension kits are available for some units for walls up to 24" thick.

The KwikDrop ThruWall is an exterior two-piece unit that includes a slim faceplate with attached chute and the chute housing. The entire body is made of stainless steel with the exception of the AirBloc. This unit requires assembly for the housing and the locking mechanism.

WORDING CHOICES

The depository flap is locked from the inside of the building with a cable system that is connected to a lever. The flap opens upward and has spring hinges to automatically close itself after use. These springs keep it securely closed when not in use, even in most winds. The opening has seals on both sides and the bottom, which should keep most weather outside of the building.

SKU	Name	Dimensions
10-8951	Ease Single ThruWall	22 ½"W x 16 ½"D x 20 ½"H

STANDARD EXTERIOR THRUWALL FEATURES

Stainless Faceplates

All Kingsley ThruWalls have a beautiful stainless steel faceplate. If it's going to be in your building for years to come, it should look nice.

Weather Sealed

Exterior ThruWalls are designed to keep the depository flap tightly closed when not in use, even in winds. The openings on the Drive-up and the KwikDrop include additional weather sealing, as pictured.

Block Air

Neoprene rubber panels help prevent outside air from entering the building when the depository door is opened. Materials slide through but the bulk of the air is contained. It also helps slow the speed of items as they fall.

Theft Deterrence

ThruWalls are designed with the proper angles to prevent someone from reaching in and taking items. We test all of our units to make sure that nothing sitting in your collection cart will be able to be grabbed and pulled out.

INDOOR RETURNS

ThruWall

The Interior HallPass ThruWall is a simple all-in-one unit that is designed to quickly pass materials through interior walls. Thumb screws allow you to lock the depository flap in place by screwing directly into the studs. This is the most secure and effective way to close the ThruWall from accepting anymore deposits. This unit comes with a sleek stainless steel faceplate and an all aluminum body.

Thumb screws are attached to the depository flap. Each screw aligns with a hole in the wall of the unit when the flap is closed. When they are tightened, the screws go through the housing and directly into the studs framing the unit.

Durable and Easy to Clean

Made of melamine laminate that is scratch and stain resistant to hold up well to abuse even in high traffic areas. The inevitable dirt and grime buildup can be easily cleaned with a damp cloth. Don't let that bother you too much either as our laminate has antibacterial properties to help prevent the spread of germs.

Bright Vivid Colors

Looking for something to match your existing library decor or school colors? We offer a rainbow of colors to choose from so you can pick your perfect match. We also offer three shades of wood grains to give you additional options if you'd prefer more of a furniture look.

STANDARD WOOD LINE FEATURES

Sturdy Construction

Our wood lines are made with $\frac{3}{4}$ " thick sides. This thickness gives it rigidity and allows it to hold up better to moisture and abuse than lighter weight substrates. We use high-quality, European hardware including hidden hinges as well as a brace for stability.

Standard Wording

Choose from "BOOKS" or "MEDIA" to be silk screened below the depository opening for stationary units. EasyRoller units come with two vinyl decals ("BOOKS" and "MEDIA") and application instructions. Children's book houses come with "books" vinyl decals already applied to the sides.

Security

All of our units come with a keyed cam lock to keep the cabinets and contents secure. Freestanding units with two doors have an additional latch to secure the left door and keep it from opening. The depository openings are also designed to keep people from reaching in to grab deposited materials.

Metal ChipGuard

A single piece metal ChipGuard surrounds each depository opening to protect against wear and keep your wood unit from chipping so it stays looking newer, longer.

Rotatable Hoods

The top of the stationary wood units can be rotated 360° for custom access door placement (rolling units excluded). In addition, the cart access doors on these units open down the middle to take up less space when open than a single door configuration.

ADA Compliance

All Kingsley woodline units are under 52" inches in height and are perfect for one-hand deposits. All units come standard with large, high contrast text and braille plates are available for purchase in your choice of wording.

INDOOR RETURNS CONT

Beautiful Furniture Quality

All of our DuraWood returns have a layer of sturdy oak veneer. Each piece is stained in one of 3 colors and hand polished to ensure a quality finish on every unit. We also offer custom staining to match your existing furniture. Children's Book House is painted in sunshine yellow and fire engine red.

Hides Dirt and Pesky Prints

The top of each non-rolling depository is covered in black textured paint which hides dust, dirt, and fingerprints to keep your unit looking new with minimal effort. Children's Book House and EasyRoller excluded. Units also have a special antimicrobial coating to help stop the spread of germs.

Added Depository Chute

Our DuraWood line comes with a metal chute to help guide deposited materials into the collection area better. Children's Book House excluded.

STANDARD WOOD LINE FEATURES

*See page 28 for unit accessories

STANDARD CART FEATURES

Light-weight, Rust-free Metal

All of our carts are made of aluminum alloy that will never rust and is over 60% lighter than comparable steel or wood carts. We believe you should only have to worry about the weight of the contents, not the cart itself. Aluminum is also more resistant to dents and dings.

Textured, Clean Appearance

Our carts are covered in a glossy, textured, black powder coat finish that is over 2 mils thick. This coating resists scratches and hides fingerprints to keep your cart looking shiny and new.

Push Like a Shopping Cart

Our handles are wide, straight, and fixed at a comfortable height to make it easy to push and steer your cart back to check-in. Fixed handles also don't bang against the side of the cart whenever something is deposited like a long u-shaped handle does.

Locking Lid

Aluminum powder coated lid has a slot for accepting materials and a cam lock to provides a minimum level of security. Each lid is attached with a durable piano hinge that will hold up to years of use.

High Capacity models come with 4" casters. The smaller casters mean that there is more room in the cart for more materials.

Standard Wording

Easy to read decals with the word "RETURN" in big white letters are placed on two sides of the cart. Decals for both "BOOKS" and "MEDIA" are included so you can label the lid with the intended use.

EasyRoller carts come with 6" diameter casters to make them easier to push when there's a full load. They are up to 50% easier to push versus 3" casters. The larger caster does leave these carts with a smaller carrying capacity.

Ergonomic Loading

Every cart includes a self-leveling float tray that lowers as materials are added and raises as they are removed. This keeps the tray at the optimal height for collecting returns to reduce damage done to your collections.

Stability and Noise Reduction

Thick guide rods keep your float tray from bending and warping from uneven distribution of materials. The guide rods have dampeners at either end to ensure a tight fit and help eliminate rattling, so the overall noise of the cart is reduced.

Quality, easy to push casters

All four casters are plate mounted, non-marring, and made of materials that resist abrasive surfaces such as asphalt. The two casters on the handle side are ball bearing swivel casters that come with foot pedal locks. The other two casters are fixed.

CARTS

High Capacity

Our High Capacity carts come with 4" diameter wheels to allow you the most amount of room for collections while still being able to push it around comfortably.

STANDARD CART FEATURES

Light-weight, Rust-free Metal

All of our carts are made of aluminum alloy that will never rust and is over 60% lighter than comparable steel or wood carts. We believe you should only have to worry about the weight of the contents, not the cart itself. Aluminum is also more resistant to dents and dings.

Textured, Clean Appearance

Our carts are covered in a glossy, textured, black powder coat finish that is over 2 mils thick. This coating resists scratches and hides fingerprints to keep your cart looking shiny and new.

Push Like a Shopping Cart

Our handles are wide, straight, and fixed at a comfortable height to make it easy to push and steer your cart back to check-in. Fixed handles also don't bang against the side of the cart whenever something is deposited like a long u-shaped handle does.

EasyRoller

The larger the caster, the easier it is to move. Our 6" diameter EasyRoller casters are up to 50% easier to roll across long distances, up ramps, and through inclement weather, like snow, compared to 3" industry standard casters. These carts are the same ergonomic height as our High Capacity Carts but the bins are slightly smaller to accommodate the larger wheels. If you struggle with your book carts, try our EasyRoller versions.

EASYROLLER

30

50

60

SKU	Name	Dimensions	Book/Media
33-9030	30 EasyRoller Cart	20"W x 21 1/4"D x 38 1/2"H	197 / 492
33-9050	50 EasyRoller Cart	25 3/8"W x 27 1/6"D x 38 1/2"H	300 / 750
33-9060	60 EasyRoller Cart	31 1/8"W x 34 5/16"D x 38 7/16"H	412 / 1028

*See page 28 for unit accessories

Ergonomic Loading

Every cart includes a self-leveling float tray that lowers as materials are added and raises as they are removed. This keeps the tray at the optimal height for collecting returns to reduce damage done to your collections.

Stability and Noise Reduction

Thick guide rods keep your float tray from bending and warping from uneven distribution of materials. The guide rods have dampeners at either end to ensure a tight fit and help eliminate rattling, so the overall noise of the cart is reduced.

Quality, easy to push casters

All four casters are plate mounted, non-marring, and made of materials that resist abrasive surfaces such as asphalt. The two casters on the handle side are ball bearing swivel casters that come with foot pedal locks. The other two casters are fixed.

CARTS CONT.

RainOff

Protect your collection from the elements with a RainOff covered cart. You'll never have to worry about forgetting or fumbling with cart covers again! Each RainOff cart comes with a hinged metal lid that stays at the side of the cart and can be quickly closed to keep your collection out of the elements.

HIGH CAPACITY

SKU	Name	Dimensions	Book/Media
30-9630	30 RainOff High Capacity Cart	20 "W x 21 5/16"D x 38 1/4"H	250 / 610
30-9650	50 RainOff High Capacity Cart	25 7/8"W x 27 1/8"D x 38 3/8"H	380 / 950
30-9660	60 RainOff High Capacity Cart	31 1/16"W x 34 7/16"D x 38 3/8"H	560 / 1400
38-9660	60 RainOff DualDropHigh Capacity Cart	31 1/16"W x 34 7/16"D x 38 3/8"H	220 & 400

High Capacity models come with 4" casters. The smaller casters mean that there is more room in the cart for more materials.

*See page 28 for unit accessories
